

Company Presentation

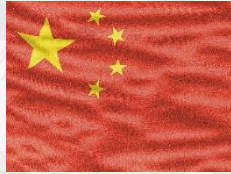

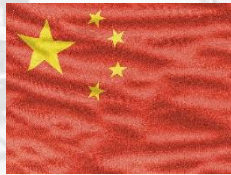

www.Ti-Cons.com

- **Offering know-how for the production of titanium dioxide (TiO₂) which is the most important white colour pigment.**
- **Delivering all necessary services for the implementation of the production of titanium dioxide, either for parts or for whole plants.**
- **Delivered services are:**
 - **Engineering (from basic to detail)**
 - **Construction supervision**
 - **Training**
 - **Commissioning**
 - **Operation**
 - **After sales support.**

- **Founded in 2005.**
- **Team is composed of experienced experts who are in the industry for decades.**
- **Customers spread all over the world:**
 - **China**
 - **India**
 - **Australia**
 - **Brazil**

Project Scope	Location	Country	Involved Capacity	Status
Know-how transfer for the engineering and start-up of a two new calcining and off-gas treatment lines	Jiangsu Province	 (PR China)	50,000 t/a	In Operation
Know-how transfer for the engineering and start-up of a new calcining and off-gas treatment line	Hubei Province	 (PR China)	20,000 t/a	In Operation
Technology transfer including extended basic engineering and start-up of a post treatment unit at existing plant	Tamil Nadu	 (India)	15,000 t/a	Under construction
Technology transfer including Front End Engineering Design (FEED) for a new plant	Northern Territory	 (Australia)	100,000 t/a	FEED
Technology transfer including Front End Engineering Design (FEED) for a new plant	Bahia	 (Brazil)	30,000 t/a	FEED

Project Scope	Location	Country	Involved Capacity	Status
Technology transfer including engineering and start-up of a complete chloride plant	Yunnan Province	 (PR China)	60,000 t/a	In Operation
Technology transfer including engineering and start-up of a complete chloride plant	Henan Province	 (PR China)	100,000 t/a	In Operation
